

XmlRpc::XmlRpcValue

```
classDiagram
    class XmlRpcValue["XmlRpc::XmlRpcValue"]
    class SuperValue["SuperValue"]
    SuperValue --|> XmlRpcValue
```

The diagram illustrates a class hierarchy. At the top is the 'XmlRpc::XmlRpcValue' class, represented by a white box with a black border and two empty internal compartments. Below it is the 'SuperValue' class, represented by a gray box with a black border and three compartments. The top compartment of 'SuperValue' contains the class name, the middle is empty, and the bottom contains two public methods: '+ setStruct()' and '+ setArray()'. A blue arrow with an open triangular head points from the top of the 'SuperValue' box to the bottom of the 'XmlRpc::XmlRpcValue' box, indicating that 'SuperValue' inherits from 'XmlRpc::XmlRpcValue'.

SuperValue

+ setStruct()  
+ setArray()
